Quick facts

| | |
|---|--|
| Manager: | China Asset Management (Hong Kong) Limited |
| Investment Delegate: | Mackenzie Financial Corporation – Canada (external delegation) |
| Trustee: | State Street Trust (HK) Limited |
| Transfer Agent: | State Street Bank and Trust Company |
| Ongoing charges over a year[#]: | Class A Units: 0.35% Class B Units: 0.99% |
| Annual Tracking difference^{##}: | Class A Units: -0.35% Class B Units: -0.99% |
| Index: | Bloomberg Asia USD Investment Grade Bond Index |
| Dealing Frequency: | Daily on each business day |
| Base currency: | HKD |
| Financial year end: | 31 December |
| Distribution policy: | <p><i>Accumulation Unlisted Classes of Units:</i> There will be no dividend distributions. All interest and other income earned on investments will be accumulated and re-invested into the Sub-Fund on behalf of the Unitholders of the relevant accumulation Classes.</p> <p><i>Distribution Unlisted Classes of Units:</i> The Manager intends to distribute income to unitholders at least quarterly (usually in March, June, September and December of each year). Distributions may be paid out of capital or effectively out of capital as well as income at the Manager's discretion. This may result in an immediate reduction of the NAV per unit of the Sub-Fund.</p> |

[#] As the Unlisted Class of Units of the Sub-Fund is newly set up, this figure is a best estimate only and represents the sum of the estimated ongoing charges over a 12-month period of an Unlisted Class, expressed as a percentage of the estimated average net asset value for the same period for the relevant Class. It may be different upon actual operation of the Unlisted Class of Units and may vary from year to year. The estimated ongoing charges do not represent the estimated tracking error.

^{##} This is an estimated annual tracking difference. Investors should refer to the website of the Sub-Fund for more up-to-date information on actual tracking difference.

What is this product?

ChinaAMC Asia USD Investment Grade Bond ETF (the “**Sub-Fund**”) is a fund constituted in the form of a unit trust established under Hong Kong law and is a sub-fund of the ChinaAMC Global ETF Series II. The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds issued by the SFC.

The Sub-Fund offers both listed class of Units (the “Listed Class of Units”) and unlisted

This website has not been reviewed by the SFC.

classes of Units (the “Unlisted Classes of Units”). This statement contains information about the offering of the Unlisted Class of Units, and unless otherwise specified, references to “Units” in this statement shall refer to the “Unlisted Class of Units”. Investors should refer to a separate statement for the offering of the Listed Classes of Units.

Objective and Investment Strategy

Objective

The Sub-Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the Bloomberg Asia USD Investment Grade Bond Index (the “Index”).

Strategy

The Manager intends to adopt a representative sampling strategy to achieve the investment objective of the Sub-Fund.

The Sub-Fund aims to invest at least 90% of its assets in achieving the investment objective. The Sub-Fund may invest, either directly or indirectly, in bonds comprised in the Index, or in securities that are not included in its Index, but which the Manager believes will help the Sub-Fund achieve its investment objective. The Sub-Fund may also invest in other investments, including but not limited to: money market instruments or funds that invest exclusively in money market instruments, in stocks or bonds that are in the relevant market but not in the Sub-Fund’s Index (as indicated above).

There is no current intention for the Sub-Fund to invest more than 10% of its net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade or which are non-rated (unless such non-rated Securities are issued by issuers of investment grade). “Investment grade” is defined as a credit rating at or above Baa3/BBB-/BBB- using the middle rating of Moody’s, S&P and Fitch.

The Sub-Fund currently does not intend to:

- (a) engage in securities lending transactions, sale and repurchase transactions or reverse repurchase transactions; or
- (b) invest in any financial derivative instruments for hedging or non-hedging purposes (i.e. the Sub-Fund will not use derivatives for any purposes).

Where the Sub-Fund does engage in securities financing transactions and/or invest in financial derivative instruments, prior approval shall be obtained from the SFC (if so required) and no less than 1 month’s prior notice (or such other notice period as required by the Code) will be given to the Unitholders.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in the Prospectus.

The Manager has appointed Mackenzie Financial Corporation as investment delegate of the Sub-Fund, whereby the Investment Delegate exercises investment discretion in respect of the investments of the Sub-Fund and is responsible for the selection and ongoing monitoring of the Sub-Fund’s investments pursuant to the above investment objective and strategy, subject to the oversight of the Manager.

Index

The Index is a market capitalisation weighted index which measures the performance of fixed rate USD denominated government-related and corporate investment grade bonds, including government-related bonds, corporate bonds, fixed-rate bullet, puttable and callable bonds of the Asia ex-Japan region.

To be eligible for inclusion in the Index, a security must meet the following criteria:

- (a) its issuer belongs to one of eligible Asian markets. As at the date of this statement, the eligible Asian markets are Bangladesh, mainland China, Hong Kong, India, Indonesia, Macau, Malaysia, Mongolia, Pakistan, the Philippines, South Korea, Singapore, Sri Lanka, Taiwan, Thailand and Vietnam;
- (b) its principal and coupons must both be denominated in USD;
- (c) it must have a minimum outstanding amount of USD350 million;
- (d) it must have a term to maturity of at least one year;
- (e) for a security with coupon that converts from fixed to floating rate, it must have a term to conversion date of at least one year;
- (f) it must have fixed-rate coupons, or step-up coupons and those that change according to a predetermined schedule;
- (g) if a bond is rated, it must be considered as investment grade (as defined above) to be included in the Index. The Index may also include non-rated bonds issued by investment grade (as defined above) issuers; and
- (h) it must be fully taxable, publicly issued in the global and local markets.

Each bond issuer's weighting is capped at 4% of the market value of the uncapped Bloomberg Asia USD Investment Grade Bond Index.

The Index was launched on 22 May 2014. It had an inception date of 1 July 2009 with a base level of 100.

The Index is a total return gross index. A total return gross index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested gross of any taxes that may apply.

As at 13 December 2024, the Index had a total market capitalisation of USD 621.72 billion and consisted of 886 constituents out of the eligible Asian markets defined by the Index.

The Index is denominated in USD.

The Manager (and each of its Connected Persons) is independent of Bloomberg Index Services Limited, the Index Provider.

You can obtain the most updated list of the constituents of the Index together with their respective weightings and additional information of the Index including the index methodology and the closing level of the Index from the website of Bloomberg Index Services Limited at <https://www.bloomberg.com/professional/product/indices/>. This website has not been reviewed by the SFC. Please refer to the Manager's website for the latest hyperlink for the Index.

Use of derivatives / investment in derivatives

The Sub-Fund will not use derivatives for any purposes.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

Interest Rate Risk

- Because the Sub-Fund invests in fixed-income securities, the Sub-Fund is subject to interest rate risk. Interest rate risk is the risk that the value of the Sub-Fund's portfolio will decline because of rising interest rates. Interest rate risk is generally lower for shorter-term investments and higher for longer-term investments.

Liquidity Risk

- The Sub-Fund is subject to liquidity risk as continued regular trading activity and active secondary market for bonds is not guaranteed. The Sub-Fund may suffer losses in trading such instruments.
- The bid and offer spread of the price of bonds may be large, so the Sub-Fund may incur significant trading and realisation costs and may suffer losses accordingly.
- As such, there can be no assurance that investors will be able to dispose of their Units at prices in the amounts and at the times at which they would wish to or which they may otherwise be able to do in respect of other HKD denominated securities listed on the SEHK.

Issuer Counterparty / Sovereign Debt Risk

- The Sub-Fund is exposed to the credit/insolvency risk of issuer of the bonds that the Sub-Fund may invest in.
- The Sub-Fund invests in sovereign debt securities and such investments involve special risks. The repayment of debts by a government is subject to various factors including the economic and political factors. The governmental entity that controls the repayment of sovereign debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. The Sub-Fund's recourse against a defaulting sovereign is limited.
- The bonds that the Sub-Fund invests in are typically unsecured debt obligations and are not supported by any collateral. The Sub-Fund will be fully exposed to the credit/insolvency risk of the bond issuers as an unsecured creditor.

Credit Downgrade Risk

- Credit rating of issuers of fixed income instruments and credit rating of investment grade securities may be downgraded, thus adversely affecting the value and performance of the Sub-Fund holding such investments.
- Investors should note that there is no assurance that the bond invested by the Sub-Fund or the bond issuer will continue to have an investment grade rating or continue to be rated.

Valuation Risk

- In a thinly traded market, it may be more difficult to achieve fair value when purchasing or selling underlying Securities because of the wide bid-ask spread. The inability to transact at advantageous times or prices may result in a reduction in the Sub-Fund's returns.
- Further, changing market conditions or other significant events, such as credit rating downgrades affecting issuers or major financial institutions, may also pose valuation risk to the Sub-Fund as the value of the Sub-Fund's portfolio of fixed income instruments may become more difficult or impossible to ascertain. If such valuations should prove to be incorrect, the net asset value of the Sub-Fund may need to be adjusted and may be adversely affected.

Management Risk

- Because there can be no guarantee that the Sub-Fund's performance is identical to that of the Index, it is subject to management risk. This is the risk that the Manager's and the Investment Delegate's strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. In addition, the Manager and the Investment Delegate (as a delegate of the Manager) have absolute discretion to exercise Unitholders' rights with respect to securities comprising the Sub-Fund. There can be no guarantee that the exercise of such discretion will result in the investment objective of the Sub-Fund being achieved.

Reliance on the Investment Delegate Risk

- The Manager has delegated the exercise of investment discretion for the Sub-Fund to the Investment Delegate. Unitholders must rely on the Investment Delegate in implementing the investment strategies and the performance of the Sub-Fund is largely dependent on the services and skills of its officers and employees. In the case of loss of service of the Investment Delegate or any of its key personnel, as well as any significant interruption of the Investment Delegate's business operations or in the extreme case of the insolvency of the Investment Delegate, the trustee may not find successor managers/investment delegates with the requisite skills, qualifications and the new appointment may not be on equivalent terms or of similar quality. The occurrence of any of these events may have an adverse impact on the Sub-Fund's performance and thus the value of your investment.

Differences in dealing arrangements between Listed and Unlisted Classes of Units

- Investors of Listed and Unlisted Classes of Units are subject to different pricing and dealing arrangements. The NAV per Unit of each of the Listed and Unlisted Classes of Units may be different due to different fees and cost applicable to each class. The trading hours of The Stock Exchange of Hong Kong Limited applicable to the Listed Class of Units in the secondary market and the dealing deadlines in respect of the Listed Class of Units (on the primary market) or Unlisted Classes of Units are also different.
- Units of the Listed Class of Units are traded on the stock exchange in the secondary market on an intraday basis at the prevailing market price (which may diverge from the corresponding NAV), while Units of the Unlisted Classes of Units are sold through intermediaries based on the dealing day-end NAV and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Unlisted Classes of Units may be at an advantage or disadvantage compared to investors of the Listed Class of Units.

- In a stressed market scenario, investors of the Unlisted Classes of Units could redeem their Units at NAV while investors of the Listed Class of Units in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding NAV) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Units could sell their Units on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Classes of Units could not do so in a timely manner until the end of the day.

Tracking Error Risk

- The Sub-Fund only holds a representative sample of securities that represents the profile of the Index and may invest in bonds not included in the Index. The bonds held by the Sub-Fund may also be over or underweight relative to those bonds in the Index. It is therefore possible that the Sub-Fund may be subject to larger tracking error than other traditional ETFs that fully replicates the Index. Other factors such as fees and expenses, and inability to rebalance the Sub-Fund's holdings in response to changes to the Index may also cause tracking error.

Emerging Market Risk

- The Sub-Fund invests in a number of Asian emerging markets. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

Over-the-Counter Market Risk

- Over-the-counter (“**OTC**”) markets are subject to less governmental regulation and supervision of transactions (in which many different kinds of bonds are generally traded) than organised exchanges. Many of the protections afforded to participants on some organised exchanges, such as the performance guarantee of an exchange clearing house, may not be available in connection with transactions on OTC markets. Therefore, by entering into transactions on OTC markets, the Sub-Fund will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the Sub-Fund will sustain losses.

Income Risk

- Falling market interest rates can lead to a decline in income for the Sub-Fund. This can result when, in declining interest rate environment, the Sub-Fund reinvests into securities at a lower yield than then-current Sub-Fund portfolio yield.

Illiquidity of Bonds Close to Maturity Risk

- The Sub-Fund's underlying fixed income securities may become more illiquid when nearing maturity. Such illiquidity may reduce the returns of the Sub-Fund because the Sub-Fund cannot sell the illiquid securities at an advantageous time or price.

Investment Risk

- The Sub-Fund is an investment fund. There is no guarantee of the repayment of principal. Therefore your investment in the Sub-Fund may suffer losses.

Foreign Exchange Risk

- An investment in the Sub-Fund may directly or indirectly involve exchange rate risk. The constituent securities of the Index may be denominated in currencies other than the base currency of the Sub-Fund (which is the HKD). A class of Units may be designated in a currency other than the base currency of the Sub-Fund. Fluctuations in the exchange rates between such currency and the base currency may have an adverse impact on the performance of the Sub-Fund.

Passive Investment Risk

- The Sub-Fund is not actively managed and will not adopt any temporary defensive position against any market downturn. Therefore when there is a decline in the Index, the Sub-Fund will also decrease in value. Investors may suffer significant losses accordingly.

RMB currency risk and RMB denominated classes risk

- RMB is currently not freely convertible and is subject to exchange controls and restrictions which, under exceptional circumstances, may cause a delay in payment of redemptions and/or dividend payments in RMB. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Non-RMB based investors who invest in RMB denominated classes are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currency will not depreciate. Any depreciation of RMB could adversely affect the value of investors' investment in the RMB denominated classes of Units.

Hedged class risk

- Investors in hedged classes bear the associated costs and may also be exposed to the risks associated with the instruments used in the hedging process. There is no guarantee that the desired hedging instruments will be available or that the hedging techniques employed by the Manager will be effective in achieving their desired result. Hedging can also limit potential gains of a hedged unit class. Whilst hedging may protect investors against a decrease in the value of the base currency relative to the relevant class currency, it may also preclude investors from benefitting from any increase in value of the base currency. Investors should also be aware that the volatility of a hedged class may be higher than that of the equivalent class denominated in the Sub-Fund's base currency.
- The distribution amount and NAV of the hedged unit classes may be adversely affected by differences in the interest rates of the reference currency of the hedged unit classes and the Sub-Fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged unit classes.

Distributions out of or effectively out of capital risks

- Payment of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the NAV per Unit of the Sub-Fund. This may also reduce the capital that the Sub-Fund has available for investment in future and may constrain capital growth.

Early Termination Risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the aggregate net asset value of all the Units (including Listed Class of Units) of the Sub-Fund is less than HKD100 million. Investors should refer to “Termination” in the Prospectus for further details. Investors may suffer a loss when the Sub-Fund is terminated.

How has the fund performed?

Since the Unlisted Class of Units of the Sub-Fund is newly set up, there is insufficient data to provide a useful indication of past performance to investors.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

| <u>Fee[^]</u> | <u>What you pay</u> |
|-------------------------|-------------------------------------|
| Subscription fee | Up to 3% of the subscription amount |
| Switching fee | Up to 1% |
| Redemption fee | NA |

[^] Investors may be subject to swing pricing adjustments when they subscribe for, redeem, or switch Unlisted Classes of Units for an amount normally not exceeding 1% of the relevant NAV per Unit. For details, please refer to section “Anti-Dilution Pricing Adjustment” in Schedule 3 to Part 1 of the Prospectus.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

| | <u>Annual rate (as a % of net asset value)</u> |
|------------------------------------|---|
| Management Fee^{**} | Class A Units: 0.35% per annum Class B Units: 0.99% per annum |
| Trustee Fee | Included in the Management Fee |
| Registrar Fee | Included in the Management Fee |
| Performance Fee | Nil |
| Administration Fee | Included in the Management Fee |
| Other Ongoing Costs | Please refer to the Prospectus for details of ongoing costs payable by the Sub-Fund |

* The current fees in respect of the Sub-Fund payable to the Manager as described above may be increased on notice to Unitholders, subject to the permitted maximum rates. Please refer to the section headed “Fees and Expenses” in the Prospectus for further details of the fees and charges payable and the permitted maximum rates of such fee allowed as well as other on-going expenses that may be borne by the Sub-Fund.

Where the Sub-Fund invests in funds which are managed by the Manager or its connected persons (the “underlying funds”), the Manager will procure that the underlying fund(s) will not charge any management fee in order to ensure no double-charging of management fees.

Other fees

You may have to pay other fees when dealing in the Units of the Sub-Fund. Please refer to the Prospectus for details of other fees and expenses applicable to the subscription or redemption, or dealing in Units. You should also check with your intermediaries on the payment process including the currency that you should use for settling such fees and how they set the exchange rate to be used if any currency conversion is required in the transaction.

Additional Information

You generally buy and redeem Units at the Sub-Fund’s next-determined NAV after the Trustee receives your request in good order on or before 3:00 p.m. (Hong Kong time) being the dealing cut-off time for Unlisted Classes of Units. Different distributors may impose different dealing deadlines for receiving requests from investors. The valuation point is at approximately 4:00 p.m. (New York time) on the applicable valuation day (which coincides with each dealing day) (which is approximately 4:00 a.m. (with daylight saving time) or 5:00 a.m. (without daylight saving time) (Hong Kong time) on the calendar day immediately following the applicable valuation day).

You can find the following information in respect of the Sub-Fund at the following website at www.chinaamc.com.hk (this website has not been reviewed by the SFC).

- (a) the Prospectus and this product key facts statement in respect of the Sub-Fund (as revised from time to time);
- (b) the latest annual audited accounts and interim half yearly unaudited report (in English only);
- (c) any notices for material alterations or additions to the Prospectus or the Sub-Fund’s constitutive documents;
- (d) any public announcements made by the Sub-Fund, including information with regard to the Sub-Fund and Index, notices of the suspension of the calculation of the net asset value, changes in fees and the suspension and resumption of the subscription and redemption of Unlisted Class of Units;
- (e) the last NAV per Unit of each Unlisted Class of Units in issue;
- (f) the full holdings of the Sub-Fund (updated on a daily basis);
- (g) the tracking difference and tracking error of the Sub-Fund; and
- (h) the composition of distributions (i.e. the relative amounts of distributions paid and the percentages of dividends out of (i) net distributable income and (ii) capital) for a rolling 12-month period.

Real-time updates about the Index can be obtained through other financial data vendors. Additional and the latest updated information about the Index (including without limitation, a

description of the way in which the Index is calculated, any change in the composition of the Index, any change in the method for compiling and calculating the Index) can be obtained via the Manager's website and the Index Provider's website (neither of which, nor any other website referred to in this statement or the Prospectus, has been reviewed by the SFC). Please refer to the section on "Website Information" for the warning and the disclaimer regarding information contained in such website.

The NAV of the Sub-Fund is calculated and the price of Unlisted Classes of Units published on each business day on the website <https://www.chinaamc.com.hk> (this website has not been reviewed by the SFC).

Please refer to the Prospectus for details.
