Quick facts

Manager:	China Asset Management (Hong Kong) Limited
Investment Delegate:	Mackenzie Financial Corporation – Canada (external delegation)
Trustee:	State Street Trust (HK) Limited
Transfer Agent:	State Street Bank and Trust Company
Ongoing charges over a year[#]:	Class A Units: 0.50% Class B Units: 0.99%
Annual Tracking difference^{##}:	Class A Units: -0.50% Class B Units: -0.99%
Index:	MSCI Europe Quality 100% Hedged to USD Index
Dealing Frequency:	Daily on each business day
Base currency:	HKD
Currency hedging:	The Sub-Fund intends to invest in currency forwards for hedging purposes in order to replicate the hedging methodology of its underlying index as part of its investment strategy.
Financial year end:	31 December
Distribution policy:	<p><i>Accumulation Unlisted Classes of Units:</i> There will be no dividend distributions. All interest and other income earned on investments will be accumulated and re-invested into the Sub-Fund on behalf of the Unitholders of the relevant accumulation Classes.</p> <p><i>Distribution Unlisted Classes of Units:</i> The Manager intends to distribute income to unitholders at least semi-annually (usually in March and September of each year). Distributions may be paid</p>

[#] As the Unlisted Class of Units of the Sub-Fund is newly set up, this figure is a best estimate only and represents the sum of the estimated ongoing charges over a 12-month period of an Unlisted Class, expressed as a percentage of the estimated average net asset value for the same period for the relevant Class. It may be different upon actual operation of the Unlisted Class of Units and may vary from year to year. The estimated ongoing charges do not represent the estimated tracking error.

^{##} This is an estimated annual tracking difference. Investors should refer to the website of the Sub-Fund for more up-to-date information on actual tracking difference.

out of capital or effectively out of capital as well as income at the Manager's discretion. This may result in an immediate reduction of the NAV per unit of the Sub-Fund.

	Class B RMB (DIST):	RMB 1

Sub-Fund website: www.chinaamc.com.hk ###

What is this product?

ChinaAMC MSCI Europe Quality Hedged to USD ETF (the “**Sub-Fund**”) is a fund constituted in the form of a unit trust established under Hong Kong law and is a sub-fund of the ChinaAMC Global ETF Series II. The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds issued by the SFC.

The Sub-Fund offers both listed class of Units (the “Listed Class of Units”) and unlisted classes of Units (the “Unlisted Classes of Units”). This statement contains information about the offering of the Unlisted Class of Units, and unless otherwise specified, references to “Units” in this statement shall refer to the “Unlisted Class of Units”. Investors should refer to a separate statement for the offering of the Listed Classes of Units.

Objective and Investment Strategy

Objective

The Sub-Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the MSCI Europe Quality 100% Hedged to USD Index (the “**Index**”).

This website has not been reviewed by the SFC.

Strategy

The Manager intends to adopt primarily a full replication strategy to achieve the investment objective of the Sub-Fund. The Manager may however, in the appropriate circumstances, choose to use a representative sampling strategy.

When the Sub-Fund adopts the replication strategy, it will invest in substantially all the Index securities constituting the Index in substantially the same weightings (i.e. proportions) as these Index securities have in the Index.

When the Sub-Fund adopts the representative sampling strategy, it will invest, either directly or indirectly, in securities comprised in the Index, or in securities that are not included in its Index, but which the Manager believes will help the Sub-Fund achieve its investment objective.

Investors should note that the Manager may switch between the full replication and representative sampling strategies without notice to investors and in its absolute discretion.

There is no current intention for the Sub-Fund to engage in securities lending transactions, sale and repurchase transactions or reverse repurchase transactions. Where the Sub-Fund does engage in securities financing transactions, prior approval shall be obtained from the SFC (if so required) and no less than 1 month's prior notice (or such other notice period as required by the Code) will be given to the Unitholders.

The Sub-Fund may invest in financial derivative instruments ("**FDIs**"), including but not limited to futures and total return index swaps, for hedging or non-hedging (i.e. investment) purposes. The Sub-Fund's holdings of FDIs for non-hedging (i.e. investment) purposes will not exceed 10% of its NAV.

The Sub-Fund intends to invest in currency forwards for hedging purposes. In implementing currency hedging, the Sub-Fund will replicate the hedging methodology of the Index by investing in the constituents of the MSCI Europe Quality Index and hedging the foreign currency exposure using one-month currency forward contracts, specifically by selling each foreign currency (i.e. Swiss Franc (CHF), British Pound Sterling (GBP), Euro (EUR), Swedish Krona (SEK), Danish Krone (DKK) and Norwegian Krone (NOK)) forward at the one-month forward date. Please refer to the "Index" section below and to the Prospectus for further details of the hedging methodology of the Index.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in the Prospectus.

The Manager has appointed Mackenzie Financial Corporation as investment delegate of the Sub-Fund, whereby the Investment Delegate exercises investment discretion in respect of the investments of the Sub-Fund and is responsible for the selection and ongoing monitoring of the Sub-Fund's investments pursuant to the above investment objective and strategy, subject to the oversight of the Manager.

Index

The Index is a float adjusted modified market capitalisation weighted index that is compiled and published by MSCI Inc., the Index Provider. The Index is designed to capture the performance of quality growth stocks from the MSCI Europe Index using a quality strategy defined by MSCI Inc., based on three main fundamental variables: high return on equity ("**ROE**"), stable year-over-year earnings growth and low financial leverage, and at the same time represent the impact of currency hedging on the performance of the MSCI Europe Quality Index using one-month currency forwards.

The investable universe of the Index comprises the existing constituents of the MSCI Europe Quality Index, which is a subset of the MSCI Europe Index universe. The MSCI Europe Index is a traditional market capitalisation weighted parent index constructed based on the MSCI Global Investable Market Indexes Methodology, and includes large- and mid-capitalisation stocks across the developed market countries in Europe and covers approximately 85% of the free float-adjusted market capitalisation the European developed markets equity universe. The Index is constructed by ranking existing securities of the MSCI Europe Index based on their “Quality Scores” and selecting a fixed number of constituents from the MSCI Europe Index universe with the highest “Quality Scores”. “Quality Scores” are computed based on the average of ranking scores from three fundamental variables, namely ROE, debt-to-equity and earnings variability.

In determining the number of securities for the Index, upward rounding-off applies to round up the minimum number of securities required to target the top 30% coverage of the market capitalisation of the MSCI Europe Index. To ensure further diversification, a 5% cap is applied at each semi-annual index review so that no single constituent has a weighting of more than 5% in the Index.

The Index is fully hedged to USD by notionally selling each foreign currency (i.e. CHF, GBP, EUR, SEK, DKK and NOK) forward at the one-month forward exchange rate at the end of each month. The Index is rebalanced monthly on the last weekday of the month, when the Index will take into account the effect of rolling into new one-month forward contracts based on the newly determined amount of currency to be sold for the next month’s index calculation.

The Index was launched on 15 May 2015 and had a base level of 1,000.

The Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

As at 13 December 2024, the Index had a total market capitalisation of USD 4.53 trillion and 125 constituents out of the eligible European markets defined by the Index. The Index is denominated in USD.

The Manager (and each of its Connected Persons) is independent of MSCI Inc., the Index Provider.

You can obtain the most updated list of the constituents of the Index and additional information of the Index including the index methodology with details of currency hedging component of the Index and the closing level of the Index from the website of MSCI Inc. at <https://www.msci.com/constituents>. This website has not been reviewed by the SFC. Please refer to the Manager’s website for the latest hyperlink for the Index.

Use of derivatives / investment in derivatives

The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

Concentration and Eurozone Risk

- The Sub-Fund’s investments are concentrated in the developed markets of a single geographical region (i.e. Europe). The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments.

- The Sub-Fund invests in stocks in the European markets. Any adverse events affecting the European economy and the Euro (such as the default or threat of default by a European Union (“EU”) member country on its sovereign debt and/or the exit of EU member countries from the Eurozone) and any ongoing concerns relating to such events may have a negative impact on the Sub-Fund’s investments in the European markets.

Difference in Trading Hours Risks

- As the European stock exchanges will be open when Units in the Sub-Fund are not priced, the value of the securities in the Sub-Fund’s portfolio may change on days when investors will not be able to purchase or sell Units. Differences in trading hours between exchanges in Europe and the SEHK may increase the level of premium or discount of the trading price to the net asset value of the Units.

Derivative and Hedging Risks

- To achieve its investment objective, the Sub-Fund will invest in currency forwards for hedging purposes. Risks associated with financial derivative instruments such as currency forwards include counterparty/credit risk, liquidity risk, valuation risk, volatility risks and over-the-counter transactions risks. Financial derivative instruments may involve an embedded leverage and any such leverage component can result in a loss significantly greater than the amount invested in the derivative by the Sub-Fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the Sub-Fund.
- There can be no assurance that any hedging techniques will fully and effectively eliminate the risk exposure of the Sub-Fund. Any costs and expenses arising from currency hedging transactions, which may be significant depending on prevailing market conditions, will be borne by the Sub-Fund.
- Currency hedging will be performed irrespective of whether the target currency is declining or increasing in value. Such hedging may preclude Unitholders from benefiting from an increase in the value of any such foreign currency relative to USD.

Management Risk

- Because there can be no guarantee that the Sub-Fund’s performance is identical to that of the Index, it is subject to management risk. This is the risk that the Manager’s and the Investment Delegate’s strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. In addition, the Manager and the Investment Delegate (as a delegate of the Manager) have absolute discretion to exercise Unitholders’ rights with respect to securities comprising the Sub-Fund. There can be no guarantee that the exercise of such discretion will result in the investment objective of the Sub-Fund being achieved.

Reliance on the Investment Delegate Risk

- The Manager has delegated the exercise of investment discretion for the Sub-Fund to the Investment Delegate. Unitholders must rely on the Investment Delegate in implementing the investment strategies and the performance of the Sub-Fund is largely dependent on the services and skills of its officers and employees. In the case of loss of service of the Investment Delegate or any of its key personnel, as well as any significant interruption of the Investment Delegate’s business operations or in the extreme case of the insolvency of the Investment Delegate, the trustee may not find successor managers/investment delegates with the requisite skills, qualifications and the new appointment may not be on equivalent

terms or of similar quality. The occurrence of any of these events may have an adverse impact on the Sub-Fund's performance and thus the value of your investment.

Differences in dealing arrangements between Listed and Unlisted Classes of Units

- Investors of Listed and Unlisted Classes of Units are subject to different pricing and dealing arrangements. The NAV per Unit of each of the Listed and Unlisted Classes of Units may be different due to different fees and cost applicable to each class. The trading hours of The Stock Exchange of Hong Kong Limited applicable to the Listed Class of Units in the secondary market and the dealing deadlines in respect of the Listed Class of Units (on the primary market) or Unlisted Classes of Units are also different.
- Units of the Listed Class of Units are traded on the stock exchange in the secondary market on an intraday basis at the prevailing market price (which may diverge from the corresponding NAV), while Units of the Unlisted Classes of Units are sold through intermediaries based on the dealing day-end NAV and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Unlisted Classes of Units may be at an advantage or disadvantage compared to investors of the Listed Class of Units.
- In a stressed market scenario, investors of the Unlisted Classes of Units could redeem their Units at NAV while investors of the Listed Class of Units in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding NAV) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Units could sell their Units on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Classes of Units could not do so in a timely manner until the end of the day.

Tracking Error Risk

- The Sub-Fund may use representative sampling strategy. It is therefore possible that the Sub-Fund may be subject to a greater risk of tracking error, which is the risk that its performance may not track that of the Index accurately. Other factors such as fees and expenses, and inability to rebalance the Sub-Fund's holdings in response to changes to the Index may also cause tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

Investment Risk

- The Sub-Fund is an investment fund. There is no guarantee of the repayment of principal. Therefore your investment in the Sub-Fund may suffer losses.

Foreign Exchange Risk

- An investment in the Sub-Fund may directly or indirectly involve exchange rate risk. The constituent securities of the Index may be denominated in currencies other than the base currency of the Sub-Fund (which is the HKD). A class of Units may be designated in a currency other than the base currency of the Sub-Fund. Fluctuations in the exchange rates between such currency and the base currency may have an adverse impact on the performance of the Sub-Fund.

Passive Investment Risk

- The Sub-Fund is not actively managed and will not adopt any temporary defensive position against any market downturn. Therefore when there is a decline in the Index, the Sub-Fund will also decrease in value. Investors may suffer significant losses accordingly.

Risks associated with investment in FDIs

- Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDIs by the Sub-Fund. Exposure to FDIs may lead to a high risk of significant loss by the Sub-Fund.

RMB currency risk and RMB denominated classes risk

- RMB is currently not freely convertible and is subject to exchange controls and restrictions which, under exceptional circumstances, may cause a delay in payment of redemptions and/or dividend payments in RMB. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Non-RMB based investors who invest in RMB denominated classes are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currency will not depreciate. Any depreciation of RMB could adversely affect the value of investors' investment in the RMB denominated classes of Units.

Distributions out of or effectively out of capital risks

- Payment of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the NAV per Unit of the Sub-Fund. This may also reduce the capital that the Sub-Fund has available for investment in future and may constrain capital growth.

Early Termination Risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the aggregate net asset value of all the Units (including Listed Class of Units) of the Sub-Fund is less than HKD100 million. Investors should refer to "Termination" in the Prospectus for further details. Investors may suffer a loss when the Sub-Fund is terminated.

How has the fund performed?

Since the Unlisted Class of Units of the Sub-Fund is newly set up, there is insufficient data to provide a useful indication of past performance to investors.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

Fee[^]**What you pay****Subscription fee**

Up to 3 % of the subscription amount

Switching fee

Up to 1 %

Redemption fee

NA

[^] Investors may be subject to swing pricing adjustments when they subscribe for, redeem, or switch Unlisted Classes of Units for an amount normally not exceeding 1% of the relevant NAV per Unit. For details, please refer to section “Anti-Dilution Pricing Adjustment” in Schedule 3 to Part 1 of the Prospectus.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

	<u>Annual rate (as a % of net asset value)</u>
Management Fee**	Class A Units: 0.50% per annum Class B Units: 0.99% per annum
Trustee Fee	Included in the Management Fee
Registrar Fee	Included in the Management Fee
Performance Fee	Nil
Administration Fee	Included in the Management Fee
Other Ongoing Costs	Please refer to the Prospectus for details of ongoing costs payable by the Sub-Fund

* The current fees in respect of the Sub-Fund payable to the Manager as described above may be increased on notice to Unitholders, subject to the permitted maximum rates. Please refer to the section headed “Fees and Expenses” in the Prospectus for further details of the fees and charges payable and the permitted maximum rates of such fee allowed as well as other on-going expenses that may be borne by the Sub-Fund.

Where the Sub-Fund invests in funds which are managed by the Manager or its connected persons (the “underlying funds”), the Manager will procure that the underlying fund(s) will not charge any management fee in order to ensure no double-charging of management fees.

Other fees

You may have to pay other fees when dealing in the Units of the Sub-Fund. Please refer to the Prospectus for details of other fees and expenses applicable to the subscription or redemption, or dealing in Units. You should also check with your intermediaries on the payment process including the currency that you should use for settling such fees and how they set the exchange rate to be used if any currency conversion is required in the transaction.

Additional Information

You generally buy and redeem Units at the Sub-Fund’s next-determined NAV after the Trustee receives your request in good order on or before 5:00 p.m. (Hong Kong time) being the dealing cut-off time for Unlisted Classes of Units. Different distributors may impose different dealing deadlines for receiving requests from investors. The valuation point is at approximately 4:30 p.m. (London time) on the applicable valuation day (which coincides with each dealing day) (which is approximately 11:30 p.m. (daylight saving time) (Hong Kong time) on the applicable valuation

day or 00:30 a.m. (standard time) (Hong Kong time) on the calendar day immediately following the applicable valuation day).

You can find the following information in respect of the Sub-Fund at the following website at www.chinaamc.com.hk (this website has not been reviewed by the SFC).

- (a) the Prospectus and this product key facts statement in respect of the Sub-Fund (as revised from time to time);
- (b) the latest annual audited accounts and interim half yearly unaudited report (in English only);
- (c) any notices for material alterations or additions to the Prospectus or the Sub-Fund's constitutive documents;
- (d) any public announcements made by the Sub-Fund, including information with regard to the Sub-Fund and Index, notices of the suspension of the calculation of the net asset value, changes in fees and the suspension and resumption of the subscription and redemption of Unlisted Class of Units;
- (e) the last NAV per Unit of each Unlisted Class of Units in issue;
- (f) the full holdings of the Sub-Fund (updated on a daily basis);
- (g) the tracking difference and tracking error of the Sub-Fund;
- (h) the composition of distributions (i.e. the relative amounts of distributions paid and the percentages of dividends out of (i) net distributable income and (ii) capital) for a rolling 12-month period.

Real-time updates about the Index can be obtained through other financial data vendors. Additional and the latest updated information about the Index (including without limitation, a description of the way in which the Index is calculated, any change in the composition of the Index, any change in the method for compiling and calculating the Index) can be obtained via the Manager's website and the Index Provider's website (neither of which, nor any other website referred to in this statement or the Prospectus, has been reviewed by the SFC). Please refer to the section on "Website Information" in the Prospectus for the warning and the disclaimer regarding information contained in such website.

The NAV of the Sub-Fund is calculated and the price of Unlisted Classes of Units published on each business day on the website <https://www.chinaamc.com.hk> (this website has not been reviewed by the SFC).

Please refer to the Prospectus for details.
