Fund Factsheet

As of 30 Jun 2023

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principle. Past performance is not indicative of future results. Before investing in the ChinaAMC MSCI Asia Pacific Real Estate ETF (the "Fund"), investor should refer to the Fund's prospectus for details, including the risk factors. You should not make investment decision based on the information on this material alone. Please note:

- The Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the MSCI AC Asia Pacific Real Estate Index.
- The Fund primarily invests in securities in the real estate sector in the Asia Pacific region, including real estate investment trusts (REITs). The Fund is subject to concentration risk as a result of tracking the performance of a single geographical region (Asia) and industry (real estate sector). It is likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in Asia and the real estate sector. There are risks associated with the real estate sector and REITs in particular.
- Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The units of the Fund may trade at a substantial premium or discount to their NAV.
- The Fund is subject to tracking error risks due to factors such as fees and expenses and the representative sampling strategy that may be adopted by the Manager.
