

ChinaAMC Select Asia Bond Fund

Fund Factsheet

As of 31 Oct 2024

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- The Investment in debt instruments involves volatility and liquidity risk, credit risk, interest rate risk, valuation risk, downgrade risk and sovereign debt risk. Fixed income and debt instruments which are below investment grade or unrated are subject to lower liquidity, higher volatility, higher credit risk and greater risk of loss of principal and interest than more highly-rated debt instruments.
- Investments in Asian (such as the PRC) market involves concentration risk. The Fund is likely to be more volatile than a fund having a more diverse portfolio of investments and its value may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the Asian market.
- Investments in emerging market involves increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- Some classes of the Fund are denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. Any depreciation of RMB could adversely affect the value of investors' investments in the Fund. Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. Distribution may be paid out of capital or effectively paid out of capital amounts to a return or withdrawal of part of a unitholder's original investment or from any capital gains attributable to that original investment, which may result in an immediate reduction of the net asset value per unit.

Investment Objective

The Fund seeks to achieve long term return by investing primarily (i.e. not less than 70% of the net asset value of the Fund) in fixed income and debt instruments issued or guaranteed by issuers domiciled in Asia and whose predominant business, in the opinion of the Manager, will benefit from or is related to the economic growth in Asia.

Data Source: FactSet As of 31 Oct 2024.

Latest Fund Distribution

The dividends were paid 100% out of distributable income at varying pay-out ratio. Dividend is not guaranteed and may be paid out of capital or effectively paid out of capital. The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Annualized dividend yield = $[(1 + \text{distribution per unit} / \text{ex-dividend NAV})^{12}] - 1$.

¹Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on NAV-to-NAV, with dividend reinvested. With effect from 15 May 2020, the investment strategy of the Fund was changed. The performance of the Fund prior to 15 May 2020 was achieved under circumstances that no longer apply. The investment objective and strategy of the Fund was also changed on 10 March 2020, 6 December 2015 and 26 January 2018 respectively.

²Please refer to the Fund's prospectus for further details (including fees).

³Calculated since the inception date of each respective share class.

⁴Calculated with the weighted average of median yield to maturity of each holding.

▲ Manager's Comment

In October, US bond rates surged above 4.3% due to the combined effects of trade tensions under the Trump administration and heightened expectations of the US economy not landing softly. The unexpectedly strong non-farm payroll data prompted a reevaluation of the Fed's rate cut trajectory. The increasing likelihood of Trump's reelection raised concerns among investors about long-term bond supply and renewed inflation risks, supporting the performance of risk assets while restraining the performance of rate bonds. In Asia, the rise in the US dollar index led to weakness in most countries' currencies. However, the overall increase in credit bond yields supported credit spreads, with Chinese US dollar bonds showing greater resilience. The JACI core index fell by 1% for the month.

The US election results, especially the expected reelection of Trump, are forecasted to impact trade in some Asian countries. Nevertheless, overall internal demand and domestic policies in Asian countries continue to provide solid support. With benchmark rates rising again, there are good opportunities for bond yield allocations. We will proactively adjust positions according to policy changes in different countries.
