

ChinaAMC New Horizon China A Share Fund*

Fund Factsheet

As of 30 Apr 2024

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- The Fund invests primarily in China A-Shares listed on SSE and SZSE through the QFI status granted to the Investment Manager and through Stock Connect.
- Investment in equity securities is subject to market risk and the prices of such securities may be volatile.
- Investing in the PRC, involves risks associated with emerging market, with greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risks.
- The Fund is subject to risks relating to the QFI regime, such as change of rules and regulations, default in execution or settlement of transaction by a PRC broker or the PRC Custodian and repatriation restrictions.
- The Fund is subject to risks associated with the Stock Connect, such as change of relevant rules and regulations, quota limitations, suspension of programme.
- Investment in Mainland China debt securities involves volatility and liquidity risks, credit/counterparty risk, interest rate risk, credit rating and downgrading risk, credit rating agency risk, and valuation risk.
- The Fund may acquire FDIs for investment and/or hedging purposes. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. Exposure to FDI may lead to a high risk of significant loss by the Fund.
- The Fund will hold investments denominated in currencies different to the base currency, meaning the Fund will be at risk to adverse movements in the foreign currency rates. RMB is currently not freely convertible and is subject to exchange controls and restrictions. A non-RMB based investors in units are exposed to foreign exchange risk.

▲ Investment Objective

The Fund seeks to achieve capital appreciation and income generation by investing primarily in onshore RMB denominated equity securities issued by issuers based in, or having a significant exposure to, Mainland China and Hong Kong, as further described below. The Investment Manager contemplates investing directly into China A-Shares using its QFI status and the Stock Connect. As at the date of the Fund's prospectus, the Investment Manager, when using Stock Connect, will be limited to investments in China A-Shares listed on the SSE and the SZSE.

Fund Factsheet

▲ Portfolio Allocation

Sector Exposure (%)

▲ Manager's Comment

In April 2024, the WIND All share Index increased by 1.02%, the CSI 300 Index rose by 1.89%, and the ChiNext Index gained 2.21%. Meanwhile, the Hang Seng Index in Hong Kong performed well with a growth of 7.39%. On the other hand, the Dow Jones, S&P 500, and Nasdaq indexes in the United States experienced declines of -5%, -4.16%, and -4.41%, respectively. In terms of industries, sectors such as household appliances, finance, basic chemicals, non-ferrous metals, and pharmaceuticals outperformed the market, while sectors such as media, consumer services, real estate, computers, and construction underperformed.

The Chinese stock market in April showed a pattern of initial decline followed by a rebound. The A-share market experienced volatility and downward movement in the first and second weeks of April but rebounded consistently in the latter half, marking the third consecutive month of positive gains. We believe that the rebound was mainly driven by three factors: Firstly, the resilience of China's economic fundamentals exceeded market expectations, with a year-on-year GDP growth of 5.3% in the first quarter. Despite weakness in infrastructure and real estate, the manufacturing sector demonstrated resilience. During the disclosure period of annual and first-quarter reports, some companies increased stock buybacks and dividend payments, which contributed to market stabilization. Secondly, there were expectations regarding the political conference held at the end of the month, as well as the release of several opinions to promote the high-quality development of the capital market in mid-April, which alleviated investors' pessimism. Thirdly, compared to overseas stock markets, Hong Kong stocks offered a more obvious value proposition with lower valuations. In April, the yen depreciated significantly, leading to a shift of trading ETFs and long-only funds from markets like Japan to the Chinese market.

Looking ahead, we believe that the core contradiction in the Chinese stock market lies in the self-recovery of the Chinese economy. In the current environment, the key lies in the implementation of larger economic stimulus policies by the Chinese government and the resolution of risks associated with the real estate and local financing platforms. We expect the Chinese economy to experience a moderate recovery, and the earnings recovery of listed companies to be relatively moderate as well. However, the trend of increasing buybacks and dividends is expected to continue. After the political conference, the market will anticipate the policies for deepening reforms announced in subsequent meetings such as the Third Plenary Session, as well as the implementation of measures to address issues in the real estate industry. The extent of market recovery and the inflow of foreign capital in the future will depend on the sustainability of China's economic recovery. 2024 is a year of frequent geopolitical events, and market volatility is expected to be significant. However, both the Hong Kong and A-share markets remain at attractive valuations, with a continuous decline in domestic risk-free interest rates. We anticipate that dividend-paying targets will continue to attract attention. From a long-term perspective, we are optimistic about the performance of sectors such as healthcare, technology, and manufacturing. In the short term, we will enhance the defensive nature of the portfolio to a certain extent. In the short term, we will increase the defensiveness of our portfolio to a certain extent.
