

# ChinaAMC Select RMB Bond Fund

## Fund Factsheet

As of 30 Sep 2022

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select RMB Bond Fund (the "Fund"), through the RQFII quota obtained by the Manager, invests primarily in RMB denominated fixed income securities issued or distributed in the PRC and may invest a small portion of its assets in PRC A-Shares.
- The Fund is subject to regulations which regulate investments by RQFIIs in the PRC which have just been announced and novel in nature. Any uncertainty and change to the relevant laws and regulations (such as PRC tax laws and repatriation policy) in the PRC may adversely impact the Fund.
- Investment in single country (the PRC) markets involves concentration and other risks not typically associated with investment in more developed economies or markets.
- Investment in RMB debt instruments in the PRC involves liquidity risk, credit risk, credit rating risk and downgrade risk. There may not be a liquid or active market for such RMB debt instruments; the Fund may also be exposed to credit/insolvency risk of issuers of the debt securities. As the credit ratings of the debt instruments of the Fund are largely assigned by the credit agencies in the PRC, the methodologies adopted by such local rating agencies may not be consistent with the international rating agencies. In the event of downgrading in the credit ratings of a debt instrument or its issuer, the Fund's investment value in such security may be adversely affected.
- Investment in the Fund is subject to interest rate risk. Change of macro-economic policies in the PRC such as monetary and fiscal policy may cause changes to market interest rates, affecting the pricing of bonds and thus the return of the Fund.
- The Fund is denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. HKD Investors may suffer a loss if RMB depreciates against HKD or such other currencies.

### ▲ Investment Objective

The Fund seeks to achieve capital appreciation and income generation by principally (i.e. up to 100% of its net assets) investing in (i) RMB denominated fixed income instruments, including bonds, issued or distributed within the PRC which (a) are denominated and settled in RMB and (b) are traded on the interbank bond market or are traded or transferred on the exchange market in the PRC, and (ii) fixed income funds (including money market funds) approved by the China Securities Regulatory Commission ("CSRC") and offered to the public in the PRC\*.

\* Investment in fixed income funds approved by the CSRC which are offered to the public in the PRC will not exceed 10% of the net asset value of the Fund.

<sup>1</sup>Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on NAV-to-NAV, with dividend reinvested. The investment returns are denominated in RMB. US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar/RMB exchange rate. With effect from 9 February 2018, the investment strategy of the Fund was changed. Performance information prior to 9 February 2018 was achieved under circumstances that no longer apply. The investment objective of the Fund has also been changed on 11 April 2014.

<sup>2</sup>Please refer to the Fund's Explanatory Memorandum for further details (including fees).

<sup>3</sup>Calculated since the relevant inception date of the respective share class.

## Fund Factsheet

### ▲ Manager's Comment

Economic data of September remain muted. Both manufacturing PMI and property sales are not exciting. Even the exports data start to show a weakening sign, which has also been reflected in dropping marine freight prices. At the end of the month, a new batch of relief policy for property sector is announced in view of the deteriorating situation in the sector. However, people probably won't hold breath for the effect of it.

The market starts to watch the 20th CPC Party Congress for more clues of the path forward. If history is any guide, the Party Congress will not lay out concrete economic plans and action timelines. Moreover, it's hard for investors to interpret the implications of the political report and the personnel changes. But the Party Congress is still important from a medium- to long-term perspective. The key to watch is how the Party would strike a new balance between national security and economic development. In the 19th Party Congress five years ago, security specifically de-risk was named the top priority for economic policy. Over the following five years, we see the crackdowns on shadow banking, property developers, local government debt and fintech. The government has also refrained from another 2008-style big stimulus even in the great pains from property woe and zero-Covid. Nowadays, the question is whether the policy pendulum will swing back toward development when both GDP growth and household/business confidence have plunged. It's going to be a more difficult call to make because current geo-political environment has had such a sea-change from that of five years ago that national security has become a non-negligible risk when setting economic plans.

Bond investors appear to prefer credit bonds to rates. Yields of the former are more resilient when yields of the latter rise in the recent week in response to property relief policies. October will be a light quarter for credit bonds issuance so the buying of them may be frontloaded. Even if Sept Social Financing data (to be released in Oct) turn out to be better than expected, the improvement will likely be transient. So a sell-off of bonds, if happens, is going to be a buy opportunity.

### ▲ Portfolio Allocation

#### Sector Exposure (%)

|                                |            |
|--------------------------------|------------|
| Weighted Avg Duration          | 2.81 Years |
| Weighted Avg Credit Ratings    | AA+        |
| Weighted Avg Yield to Maturity | 0.53%      |

Credit Products include Medium Term Notes, Convertible Bonds, Corporate Bonds, Enterprise Bonds.

Data Source: Wind. Rating agencies include Dagong, China Lianhe, Pengyuan, CCXI, CCXR, Shanghai Brilliance, China LianHe. Data As of 30 Sep 2022

Data source: Bloomberg. As of 30 September 2022.

### ▲ Latest Fund Distribution

| Class            | Ex-dividend Date | Distribution | Annualized Dividend Yield |
|------------------|------------------|--------------|---------------------------|
| Class A-DIST-RMB | Sep-29-2022      | RMB 0.03     | 4.05%                     |
| Class A-DIST-USD | Sep-29-2022      | USD 0.03     | 4.89%                     |

Dividend is not guaranteed and may be paid out of capital or effectively paid out of capital.

Annualized Dividend Yield =  $[(1 + \text{distribution per unit} / \text{ex-dividend NAV})^{12}] - 1$ . The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return.
