

# ChinaAMC Select RMB Bond Fund

## Fund Factsheet

As of 29 Nov 2024

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select RMB Bond Fund (the "Fund"), through the RQFII quota obtained by the Manager, invests primarily in RMB denominated fixed income securities issued or distributed in the PRC and may invest a small portion of its assets in PRC A-Shares.
- The Fund is subject to regulations which regulate investments by RQFIIs in the PRC which have just been announced and novel in nature. Any uncertainty and change to the relevant laws and regulations (such as PRC tax laws and repatriation policy) in the PRC may adversely impact the Fund.
- Investment in single country (the PRC) markets involves concentration and other risks not typically associated with investment in more developed economies or markets.
- Investment in RMB debt instruments in the PRC involves liquidity risk, credit risk, credit rating risk and downgrade risk. There may not be a liquid or active market for such RMB debt instruments; the Fund may also be exposed to credit/insolvency risk of issuers of the debt securities. As the credit ratings of the debt instruments of the Fund are largely assigned by the credit agencies in the PRC, the methodologies adopted by such local rating agencies may not be consistent with the international rating agencies. In the event of downgrading in the credit ratings of a debt instrument or its issuer, the Fund's investment value in such security may be adversely affected.
- Investment in the Fund is subject to interest rate risk. Change of macro-economic policies in the PRC such as monetary and fiscal policy may cause changes to market interest rates, affecting the pricing of bonds and thus the return of the Fund.
- The Fund is denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. HKD Investors may suffer a loss if RMB depreciates against HKD or such other currencies.

### ▲ Investment Objective

The Fund seeks to achieve capital appreciation and income generation by principally (i.e. up to 100% of its net assets) investing in (i) RMB denominated fixed income instruments, including bonds, issued or distributed within the PRC which (a) are denominated and settled in RMB and (b) are traded on the interbank bond market or are traded or transferred on the exchange market in the PRC, and (ii) fixed income funds (including money market funds) approved by the China Securities Regulatory Commission ("CSRC") and offered to the public in the PRC\*.

\* Investment in fixed income funds approved by the CSRC which are offered to the public in the PRC will not exceed 10% of the net asset value of the Fund.

<sup>1</sup>Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on NAV-to-NAV, with dividend reinvested. The investment returns are denominated in RMB. US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar/RMB exchange rate. With effect from 9 February 2018, the investment strategy of the Fund was changed. Performance information prior to 9 February 2018 was achieved under circumstances that no longer apply. The investment objective of the Fund has also been changed on 11 April 2014.

<sup>2</sup>Please refer to the Fund's Explanatory Memorandum for further details (including fees).

<sup>3</sup>Calculated since the relevant inception date of the respective share class.

## Fund Factsheet

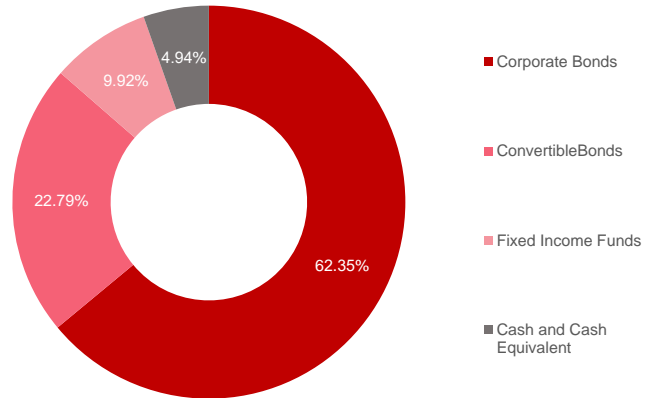

### ▲ Manager's Comment

Since late Oct, market sentiment has deteriorated as anticipation and enthusiasm for policy stimulus have subsided. Trump's election to a second term raises new concerns about the state of the economy in 2025. However, the lack of state intent to provide households with direct help leads to market fatigue and disillusionment. Before the Trump tariffs take effect in January, even good economic data, like the manufacturing PMI for November, is written off as "transitory". A long-overdue problem for the Chinese economy, weak domestic demand has only gotten worse under the current circumstances. The seeming impasse on this issue reminds some market watchers of the "lost thirty years" in Japan since the 1990s.

The Chinese A-share market has cooled down when the HK equity market has almost wiped out its gains since late September. While the A-share market is supported by so-called 'national team' funds, the HK market reflects the cautious stance of international investors in general. Chinese bond yields in late Nov broke away from their range to reach a new low, with the benchmark 10Y treasury bond trading below 2% for the first time. The yields appear to be at the low end of the fluctuation range for now, and one can wait for better entries. The major CPC meeting in mid-December may offer some clues about the next policy moves.

### ▲ Portfolio Allocation

#### Sector Exposure (%)

Weighted Avg Duration	1.41 Years
Weighted Avg Credit Ratings	AAA
Weighted Avg Yield to Maturity <sup>1</sup>	1.92%

Credit Products include Medium Term Notes, Convertible Bonds, Corporate Bonds, Enterprise Bonds.

Data Source: Wind. Rating agencies include Dagong, China Lianhe, Pengyuan, CCXI, CCXR, Shanghai Brilliance, China LianHe. Data As of 29 Nov 2024

### ▲ Latest Fund Distribution

Class	Ex-dividend Date	Distribution	Annualized Dividend Yield
Class A-DIST-RMB	Nov-28-2024	RMB 0.03	4.54%
Class A-DIST-USD	Nov-28-2024	USD 0.03	5.71%

Dividend is not guaranteed and may be paid out of capital or effectively paid out of capital.

Annualized Dividend Yield =  $[(1 + \text{distribution per unit} / \text{ex-dividend NAV})^{12}] - 1$ . The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return.

Data source: Bloomberg. As of 29 Nov 2024.

<sup>1</sup> Calculated with the weighted average of median yield to maturity of each holding.
