

ChinaAMC Select China Leap Equity Fund

Fund Factsheet | As of 31 Dec 2024

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select China Leap Equity Fund (the "Fund") invests primarily in equity securities of China-related companies with registered offices located in the People's Republic of China ("PRC") and/or Hong Kong, and/or China-related companies that do not have their registered offices in the PRC or Hong Kong which in the opinion of the Manager, have strong prospects for leap growth or will benefit from leap growth of China, by accessing whether the company's business revenue is driven by Chinese consumption increase, technology progress or demographic trend, or whether the company is covered by the development plans of the Chinese government, including but not limited to the "14th Five-Year Plan of China", the "Made in China 2025 Plan", the "Carbon Neutrality Strategy of China".
- The Fund may invest in fixed income securities issued and/or guaranteed by any single country any credit rating, pre-IPO and cornerstone investment, collective investment schemes (authorised by the SFC), cash equivalent instruments and financial derivative instruments ("FDIs") for hedging or investment purposes.
- The Fund may invest in depositary receipts that may generate additional risks compared to a direct exposure to the underlying stocks, including the risk of non-segregation of the underlying stocks from the depositary banks' own assets and liquidity risk. These may negatively affect the performance and/or liquidity of the Fund.
- Investment in equity securities is subject to market risk and the prices of such securities may be volatile, including but not limited to changes in investment sentiment, political environment, economic environment, regional or global economic instability, currency and interest rate fluctuations.
- The Fund will focus its investments in China-related equities. The Fund is likely to be more volatile than a broad-based fund, as the Fund is more susceptible to fluctuations in value resulting from limited number of holdings or from unfavourable performance in such equity that the Fund invests in. Investment in the China Leap Equity Securities is subject to significant volatility, risk greater than diversified funds, government policy, dynamic market conditions, new competing products and services, and rapid improvements in existing products and services.
- Investment in PRC markets is subject to greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risk.
- Investment in debt instruments are subject to liquidity risk, credit risk, interest rate risk, credit rating risk, valuation risk, downgrade risk and sovereign debt risk.
- Investment in other funds may no assurance that the liquidity of the underlying be sufficient to meet redemption request and investment objective and strategy is successfully achieved.
- Some Classes of the Fund are denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. If you convert HKD or any other currencies into RMB in investing in the Fund and subsequently convert the RMB redemption proceeds back to HKD or such other currencies, you may suffer a loss if RMB depreciates against HKD or such other currencies.
- The Fund will hold investments denominated in currencies different to the base currency of the Fund, meaning the Fund will be at risk to adverse movements in the foreign currency rates.
- The Fund may acquire FDIs for investment and/or hedging purposes. Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, hedging may become ineffective and the Fund may suffer significant losses.

Investment Objective

The Fund seeks to maximize capital growth by investing primarily (i.e. at least 70% of its net assets) in equity securities (such as but not limited to listed shares, depositary receipts, and exchange traded funds) of China-related companies with registered offices located in the People's Republic of China ("PRC") and/or Hong Kong, and/or China-related companies that do not have their registered offices in the PRC or Hong Kong but either (a) carry out a predominant proportion of their business activities in the PRC or Hong Kong, or (b) are holding companies which predominantly own companies with registered offices in the PRC or Hong Kong, which, in the opinion of the Manager, have strong prospects for leap growth or will benefit from leap growth of China ("China Leap Equity Securities").

▲ Manager's Comment

MSCI China Index rose by 2.47% in December. In the first half of the month, investors speculated on fiscal policy expectations, and in the second half, the market fluctuated and declined. On December 6, Premier Li Qiang of the State Council chaired an executive meeting of the State Council to hear a comprehensive inspection report on promoting high-quality development and striving to achieve the annual economic and social development goals and tasks. On December 9, the Politburo meeting emphasized stabilizing the property and stock markets and strengthening extraordinary counter-cyclical adjustments. From December 11 to 12, the Central Economic Work Conference was held, mentioning that the fiscal policy would expand the deficit and issue additional special treasury bonds, the monetary policy would cut the reserve requirement ratio and interest rates in a timely manner, the policies to expand domestic demand would be strengthened and expanded, and two new policies would be implemented to increase the income and social security of low-income groups. On December 16, the executive meeting of the State Council pointed out that it was necessary to expand the scope of local government special bonds used as project capital and appropriately increase the autonomy and flexibility of local governments.

Looking ahead, we still hold a positive view on the medium-and long-term performance of the market, but the external uncertainties faced by the market in the short term have increased. In 2024, China's economic recovery fell short of expectations, and weak domestic demand led to the profit growth of most companies falling short of expectations, putting pressure on stock price trends. However, the trend of China's monetary and fiscal policies taking effect has taken shape. With the introduction of more positive policies and the emergence of economic growth and policy signals in the future, significant improvements are expected. In 2024, the trade-in policy significantly boosted the sales of home appliances and automobiles. In 2025, the scale and scope of trade-ins are expected to further expand. In the future, attention should be paid to the intensity and rhythm of the fiscal policy, and whether it can substantially improve residents' income expectations and consumption propensity and stimulate the endogenous growth momentum of the economy. The continuous inflow of southbound funds into the Hong Kong stock market and the increase in dividend payouts and repurchase amounts by a large number of Hong Kong-listed companies to enhance shareholder returns will also help the valuation of the Hong Kong stock market to move up in the medium and long term. However, in the short term, attention needs to be paid to the tariff and geopolitical risks after Trump is elected President of the United States and their impact on China's economy and financial markets. In terms of portfolio positioning, we will continue to seek a balance between value and growth.
